DATE: 9/2/2025

To Our Valued Customers,

Subject: **Planned Water Service Interruption** – Thursday, September 4, 2025 **(8:00 AM to 6:00 PM)**

As part of the Washington State Department of Transportation's culvert replacement project at SR 104 and Lyon Creek, the Lake Forest Park Water District will conduct a scheduled shutdown of our watermain on Thursday, September 4, 2025, between 8:00 AM and 6:00 PM. This shutdown is required to complete the cut-and-cap process and install new valves and hydrant infrastructure in support of the project.

During this time, water service will be temporarily unavailable for customers located within the affected zone. We are coordinating closely with the project contractor to minimize the duration and impacts of this outage.

How to Prepare

- Store enough water in clean containers ahead of the shutdown for drinking, cooking, handwashing, and toilet flushing.
- Limit water use during the scheduled window.
- Avoid running appliances that depend on water, such as dishwashers and washing machines.
- Once service is restored, run cold water taps for several minutes to clear any air or discoloration from the lines.

We understand that service disruptions can be inconvenient, and we appreciate your patience as we work to support this important ecological and infrastructure project. Normal water service will resume as soon as the work is complete.

If you have special needs or require assistance related to this shutdown, please contact our office at (206) 365-3211.

Sincerely,

Frederick Alan Kerley
General Manager
Lake Forest Park Water District
